# WorldCereal MOOC I

DALL'E

## Data collection exercise using a mobile app

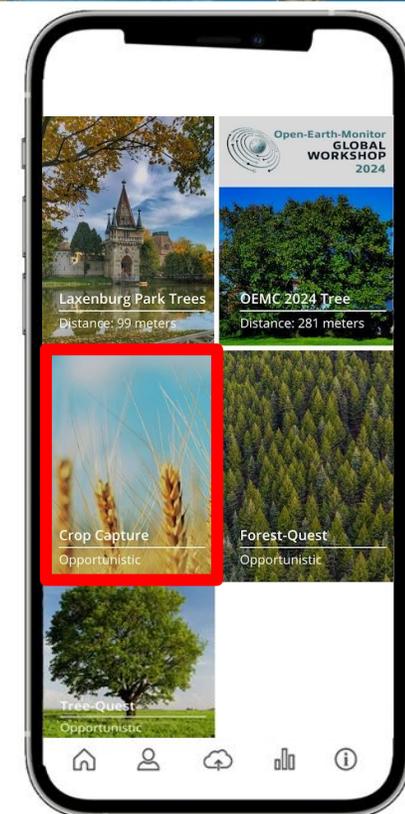

Juan Carlos Laso Bayas (IIASA)

→ THE EUROPEAN SPACE AGENCY

# Your exercise:

1. Go to the [Crop Capture webpage](#), download the **Geo-Quest app** and create an account (it's free!).
2. Select **Crop Capture**
3. Go to the **nearest crop fields** and when you are close to these, **mark each field** and follow the step-by-step instructions shown below (don't forget to **take pictures**).
4. When you have internet connection **upload the surveys**
5. Return to the [Crop Capture webpage](#), **login** and explore the data you uploaded using the **same username and password** you created for Geo-Quest. Check location and delineations with satellite imagery.
6. In the [Crop Capture webpage](#), **download** your data (GeoParquet) and **load it into the [WorldCereal RDM](#)** - see the WorldCereal RDM MOOC videos.

WorldCereal

# Step-by-step instructions

WorldCereal

  
Geo-Quest

## Crop Capture

Crop Capture is part of IIASA's Geo-Quest Platform. Crop Capture is designed to capture spatial and temporal crop information on the field.

GET IT ON  Google play

Download on the  App Store <sup>\*</sup>

Login →

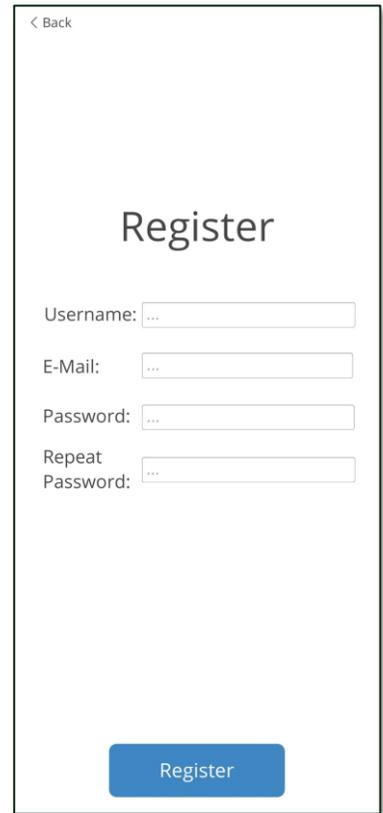

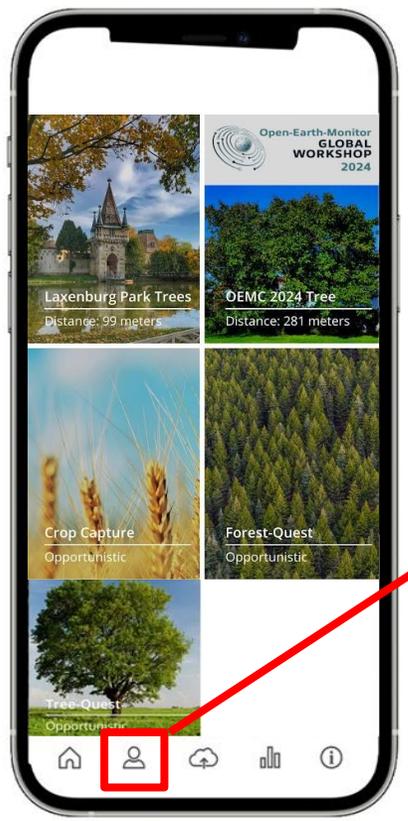

Go to <https://crop-capture.main.geo-wiki.org/>  
and download **Geo-Quest**

WorldCereal

\* In iOS download first TestFlight and then click the link again

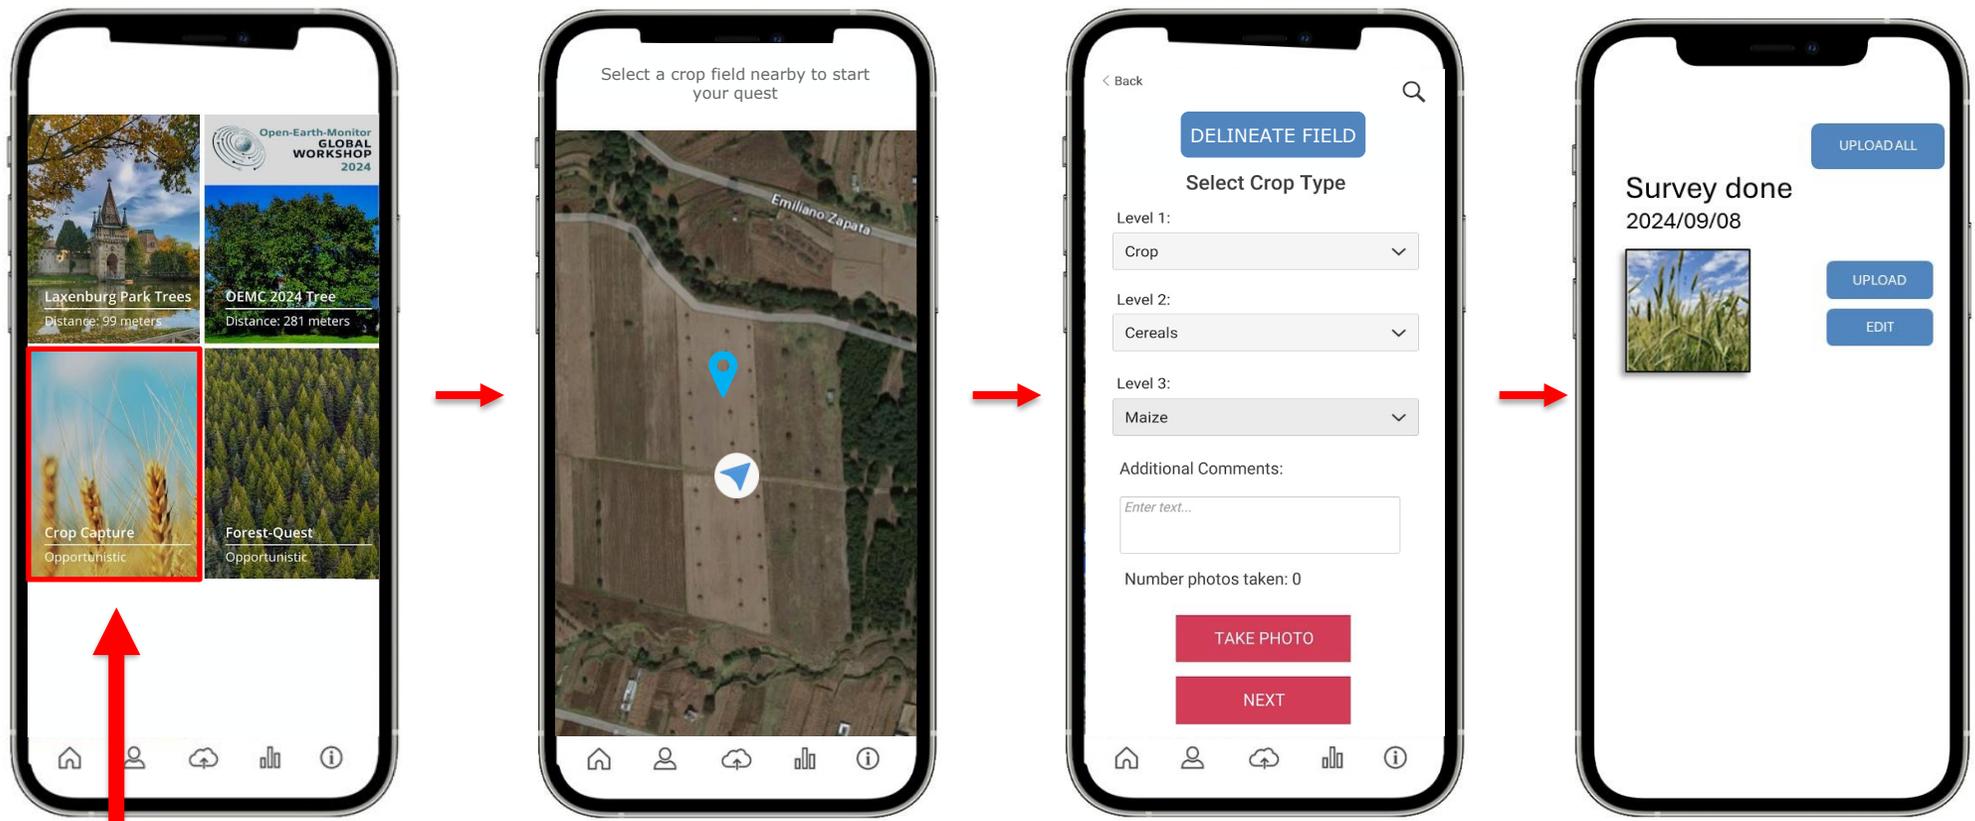

# Geo-Quest Crop Capture: Registering

In Geo-Quest, register and create a free account so you can upload your surveys

# Geo-Quest Crop Capture: Overview

Select Crop Capture to start

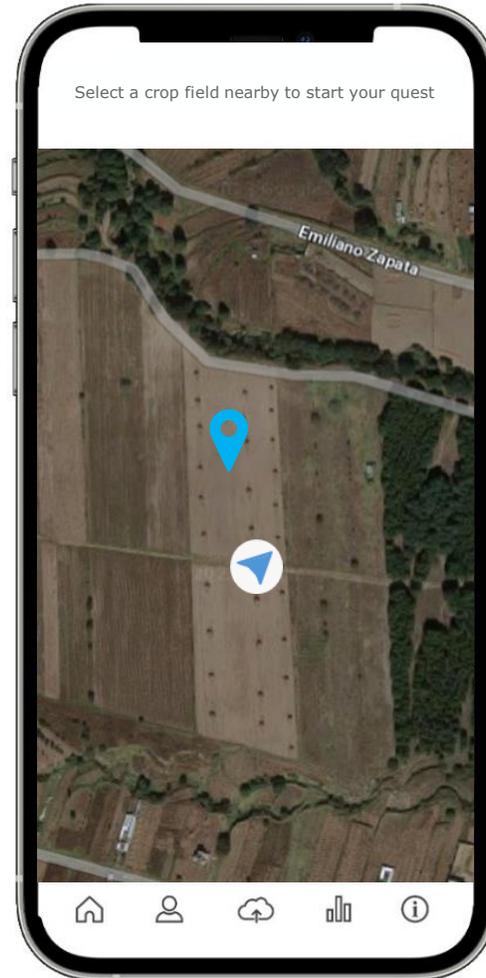

WorldCereal

Specify the location of the crop field by touching on the map.

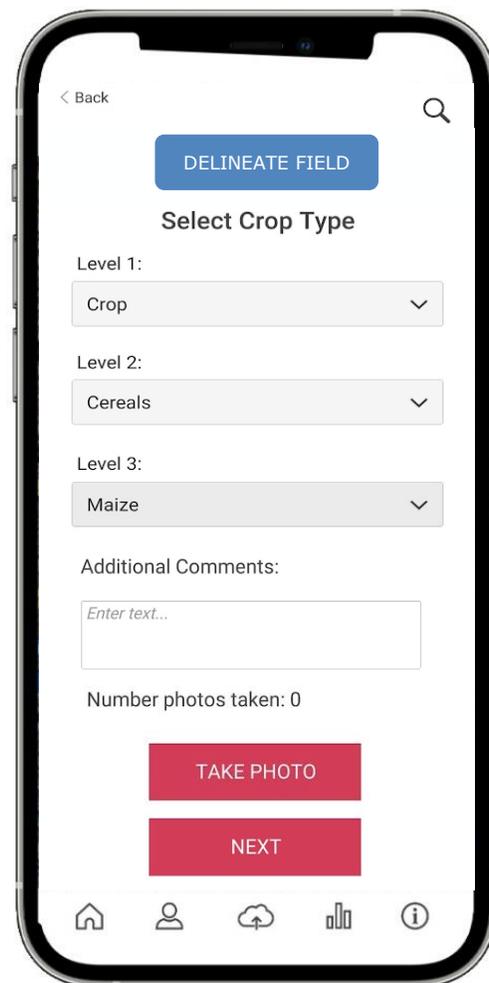

Aim for the center of the field

WorldCereal

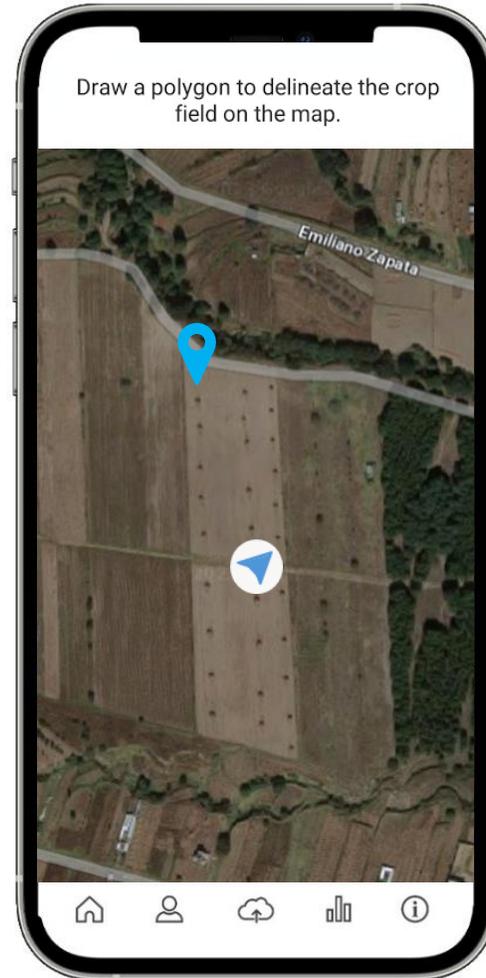

If possible, delineate the field.

Make sure that the polygon boundaries do not go overlap other fields.

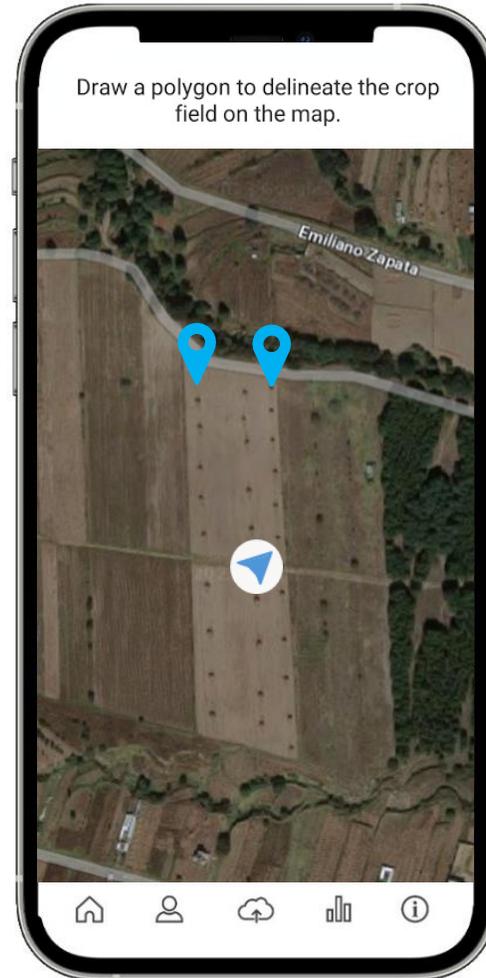

WorldCereal

Delineate a polygon by marking each of the field corners on the map

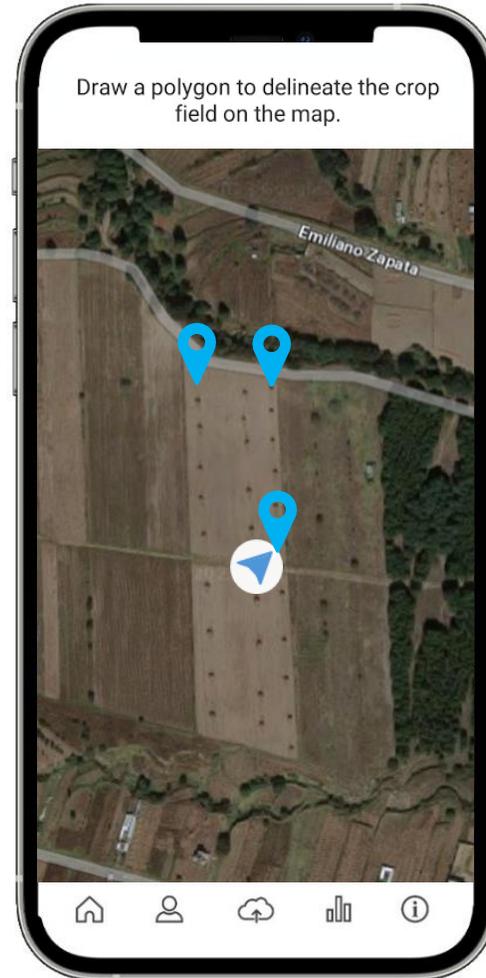

WorldCereal

Delineate a polygon by marking each of the field corners on the map

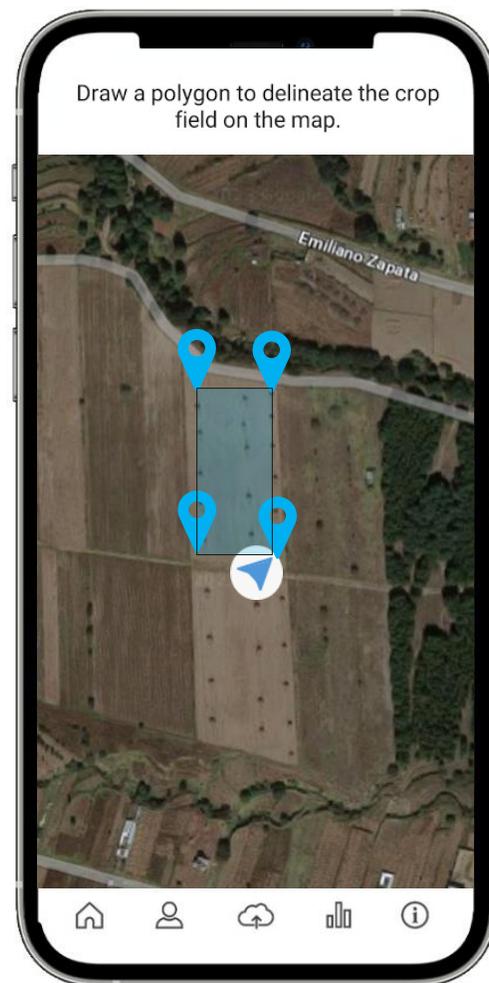

WorldCereal

Delineate a polygon by marking each of the field corners on the map

WorldCereal

Delineate a polygon by marking each of the field corners on the map

## Caution:

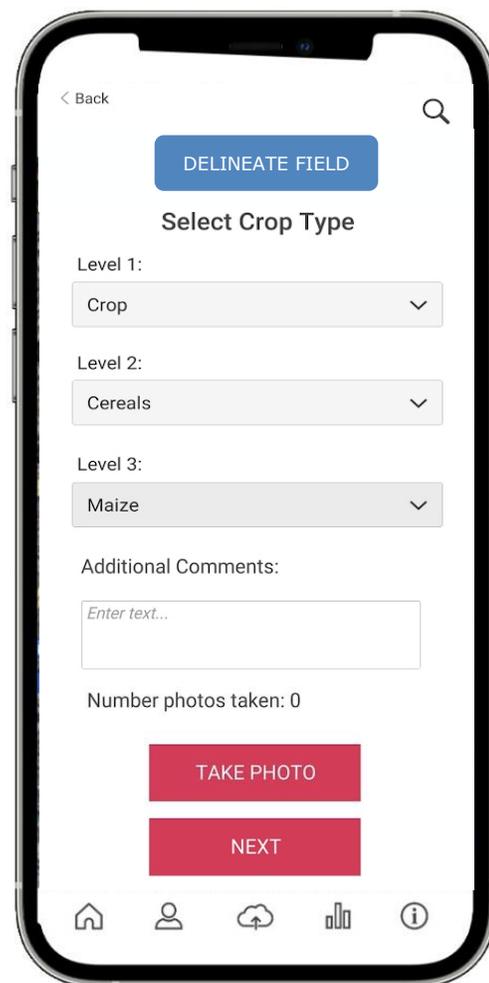

Do this only if the satellite imagery matches reality:

Very high-resolution imagery is not always up-to-date.

WorldCereal

Fill up the survey:  
Start with level 1 and  
then select the best  
matching levels 2 and  
3 as needed

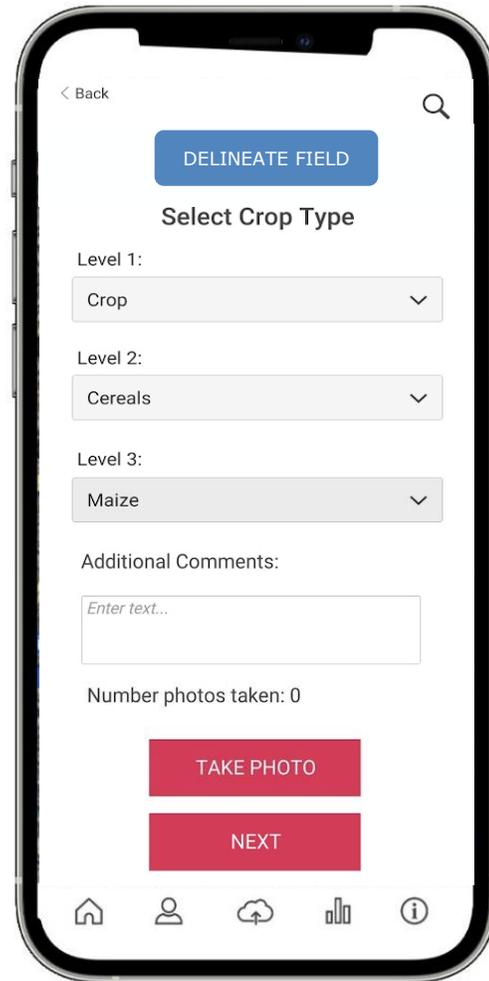

If you have additional  
comments or  
observations, use the  
Additional Comments  
box

WorldCereal

Take photos of the field to add to your survey

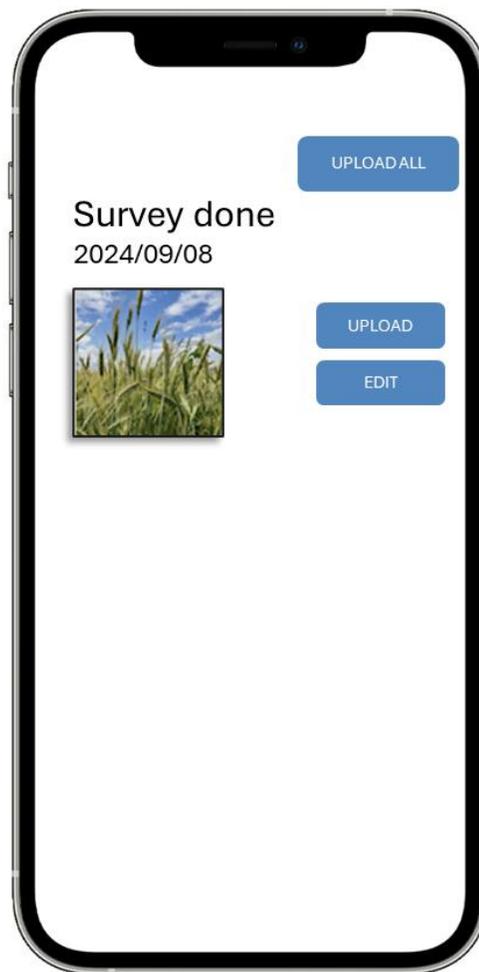

Once you are done,  
press NEXT

WorldCereal

Before uploading, you can edit your survey if needed

Once you have internet connection, upload your survey.

If you have recorded several fields, you can press **UPLOAD ALL**

WorldCereal

**Crop Capture**

Geo-Quest

Crop Capture is part of IIASA's Geo-Quest Platform. Crop Capture is designed to capture spatial and temporal crop information on the field.

GET IT ON Google play

Download on the App Store

Login →

**Login to Crop Capture with your Geo-Quest username and password:** <https://crop-capture.main.geo-wiki.org/>
